Rackspace Healthcare Solutions

Providing managed services and support for HIPAA-ready cloud workloads across public, private, hybrid and multi-cloud environments.

As a HITRUST™ CSF certified organization, Rackspace can help your healthcare organization reach its digital transformation goals while maintaining the highest levels of data and privacy standards. Additionally, Rackspace offers a Business Associate Agreement (BAA) with all dedicated hosting services — an essential element for healthcare organizations pursuing HIPAA compliance audits.

Experts Dedicated to Your Success

Whether you're a healthcare provider, payer, life sciences group or healthcare services organization, Rackspace can guide you on a path to increased efficiency, lower costs and data-centric decision making. Rackspace serves more than 2,500 healthcare organizations through an unrivaled solutions portfolio. With years of experience innovating across all leading cloud technologies, Rackspace gives you unbiased expertise you can trust.

Key Features

With its robust service offering, Rackspace helps healthcare organizations address security and compliance challenges, engage with patients through consumer-oriented apps, plan business and clinical continuity through cloud-based disaster recovery, and gain deeper insight from their data by securely hosting the largest data sets and visualization tools.

Security, Compliance and Risk Mitigation: With its HIPAA-ready cloud and HITRUST CSF certification, Rackspace addresses all of your compliance needs, including PCI DSS and PHI requirements.

Big Data and Analytics: Rackspace business intelligence capabilities deliver the big data insights and predictive analytics that can help you achieve better outcomes, including predicting and preventing chronic diseases, delivering precision medicine, mapping genomes and managing population health.

Managed Services: Rackspace offers end-to-end managed services across public, private, hybrid and multi-cloud environments, allowing you to move from a capex to opex spending model and freeing your staff to focus on innovation.

Digital Transformation: Through application development, virtual health solutions and new ways to engage patients via care compliance, clinical trials and social networks, Rackspace can help you improve patient engagement, respond quickly to business challenges and accelerate your business processes.

Advisory and Migration Services: If you're facing the daunting task of merging multiple data centers, Rackspace can help you migrate and consolidate. If you want to move to the cloud, Rackspace can help you build your cloud strategy, decrease deployment times, perform risk assessments, and simplify infrastructure and solution architectures.
